

INNOVATIVE HYDRAULIC SYSTEMS
STATIONARY INDUSTRY APPLICATIONS
MOBILE HYDRAULICS
BRAND COMPONENTS

Company SAUER BIBUS

HYDRAULIC DRIVE TECHNOLOGY IS OUR MAIN FIELD OF EXPERTISE.

Our company's development is characterised by the drive to ensure maximum customer orientation and the continuous optimisation of our processes, services and solutions.

This also explains the switch from being a pure trading company for brand products to an innovative manufacturer of complete hydraulic drive systems.

Since we noticed early on that, as well as the traded brand components, more and more customers want to use our expertise for self-developed special solutions.

Today it is the combination of years of experience as an authorised logistics and service partner for leading brands and our innovative hydraulic solutions that makes customers so interested in SAUER BIBUS.

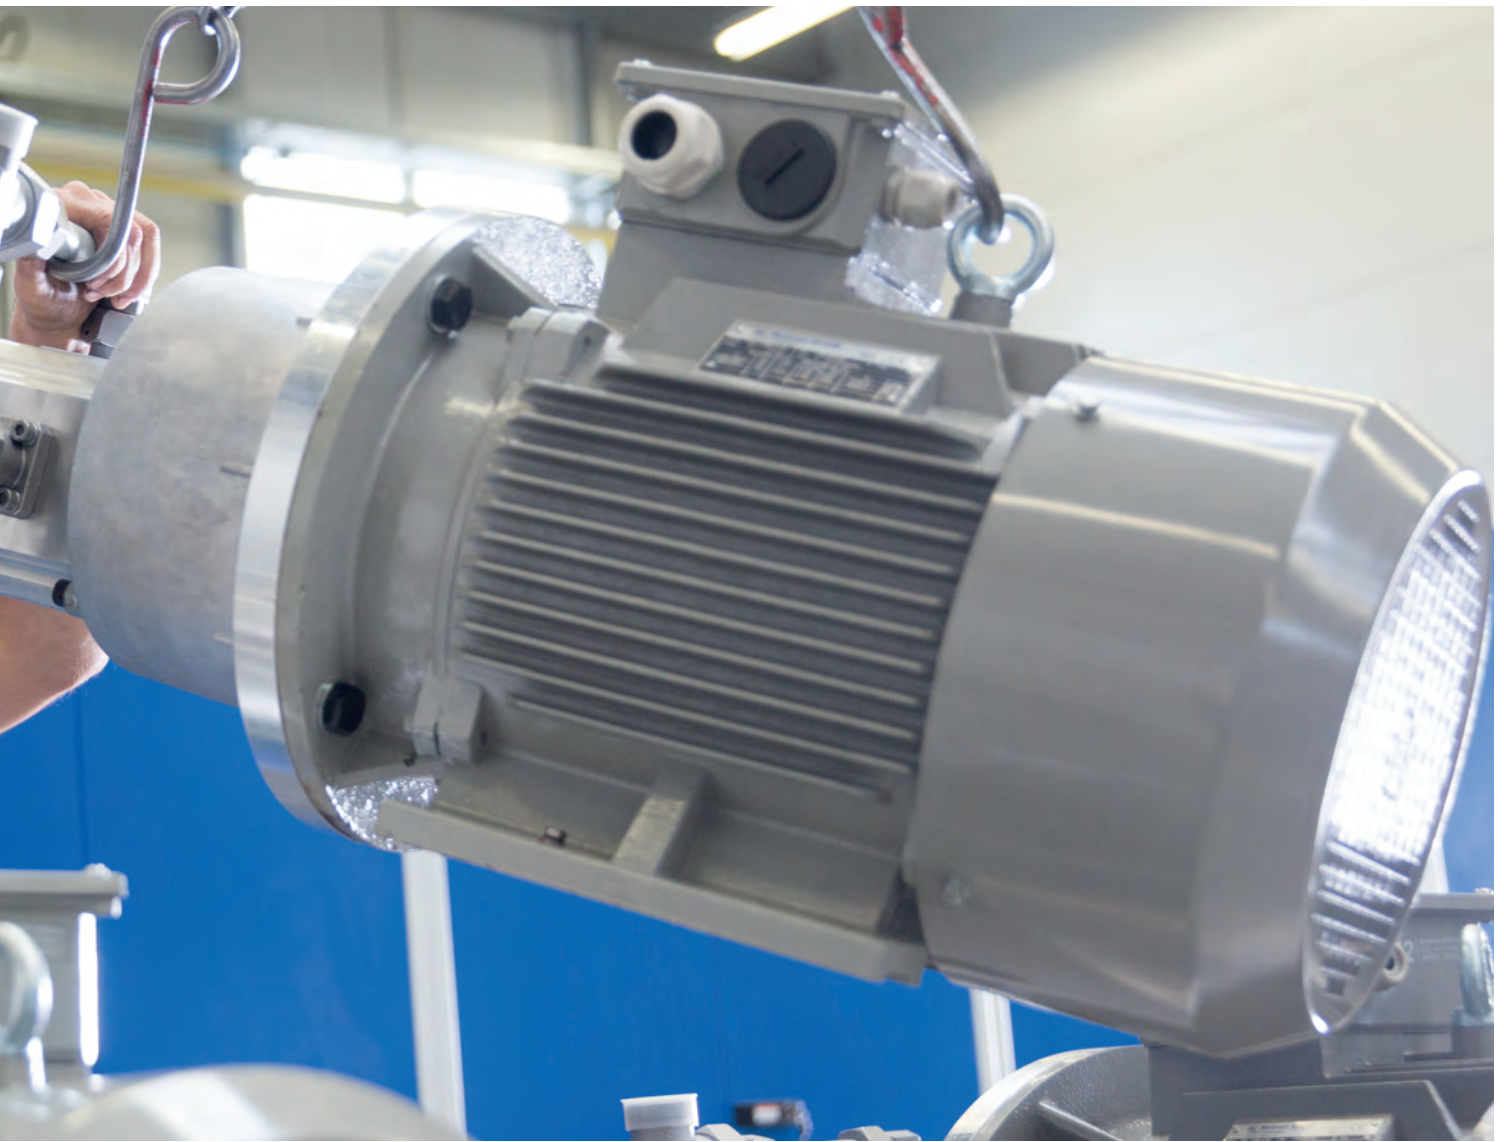

Company SAUER BIBUS

UNCOMPROMISING TOP QUALITY AS A MATTER OF PRINCIPLE.

There is no room for compromises in our customers' technology industries. That is why we demand maximum quality, whether in our own products or components from our brand partners.

In this sense, we have also managed to embed quality as a fixed underlying value in our own company philosophy. And that as an everyday requirement for all employees above and beyond mere product performance.

We would like to warmly invite you to get to know our company and the people personally.

What you can expect:

- Innovative complete hydraulic solutions for mobile and stationary use
- Authorised representation of leading brands for hydraulic components with high availability
- Service with original brand spare parts at your location or directly at our factory

Industry competence

- Vehicle construction
- Machine construction
- Plant construction
- Power pack assembly
- Software development

Innovative hydraulic systems

EXTREMELY RESILIENT AND 100% RELIABLE FOR THE JOB.

The future of hydraulic drive systems has already begun. For example, autonomous driving is one of the most exciting challenges, requiring innovative power and solid know-how as well as technical experience.

By creating a business area for our self-developed, innovative system solutions for hydraulic drives at an early stage, we have taken a decisive step towards making full use of our expertise in the best interests of our customers.

The best examples of our own developments are the Compact Drive and the Modul Drive, both hydrostatic propel drives with 45° large-angle technology on board for a large, continuous conversion range.

It is these products in particular that show the massive experience gained by intelligently combining high-performance components from our long-standing brand partners with innovative solutions made by SAUER BIBUS.

There are numerous other solutions in current projects with construction equipment and agricultural machinery manufacturers.

In SAUER BIBUS, you have found a development partner that understands your ambitions and also sees unusual demands as an opportunity.

- Self-developed hydraulic systems
- Hydrostatic propel drives
- Complete systems, assemblies and components

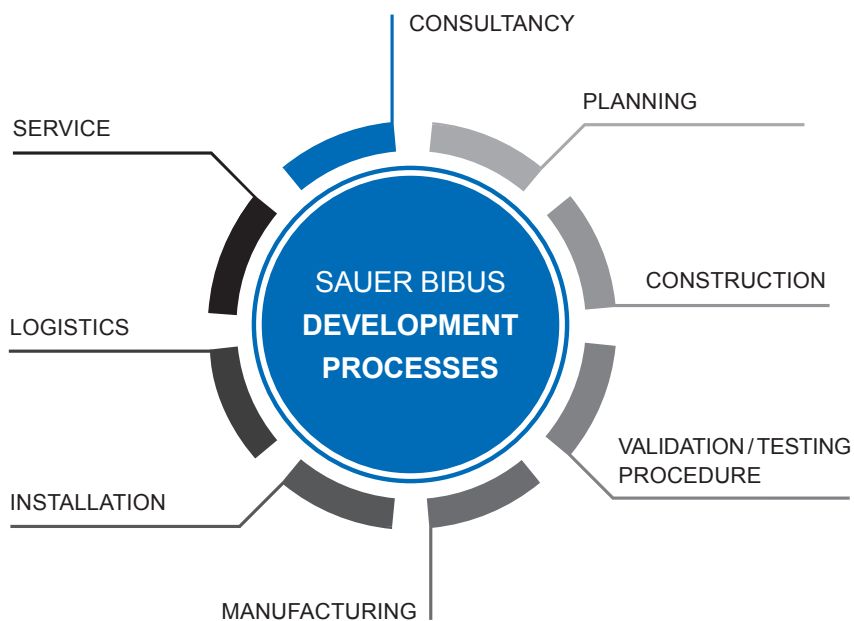

Modul Drive

Compact Drive

PROCESS SOLUTIONS FOR MAXIMUM EFFICIENCY

Our development processes are embedded in process solutions that arrange the development contract into eight clear process steps from consultancy to service.

This way you can be sure your project will be handled professionally to ensure absolute adherence to deadlines, profitability and efficiency.

Brand representation and logistics

BRAND COMPONENTS FROM LEADING MANUFACTURERS WITH THE BEST CONSULTANCY.

Trading hydraulic components from leading brands is SAUER BIBUS's second business area. As an authorised representative, we take care of consultancy and all logistics services for our customers in close collaboration with our brand partners.

These brand partners include Danfoss, Daikin, Poclain and Turolla, as well as Comatrol, Kawasaki and many other quality brands. Our range of brands means that we are in a position to cover practically all requirements for parts, components and assemblies in the hydraulics sector. Our logistics centre is geared towards shipping urgently required parts within 24 hours of the order being placed in most cases.

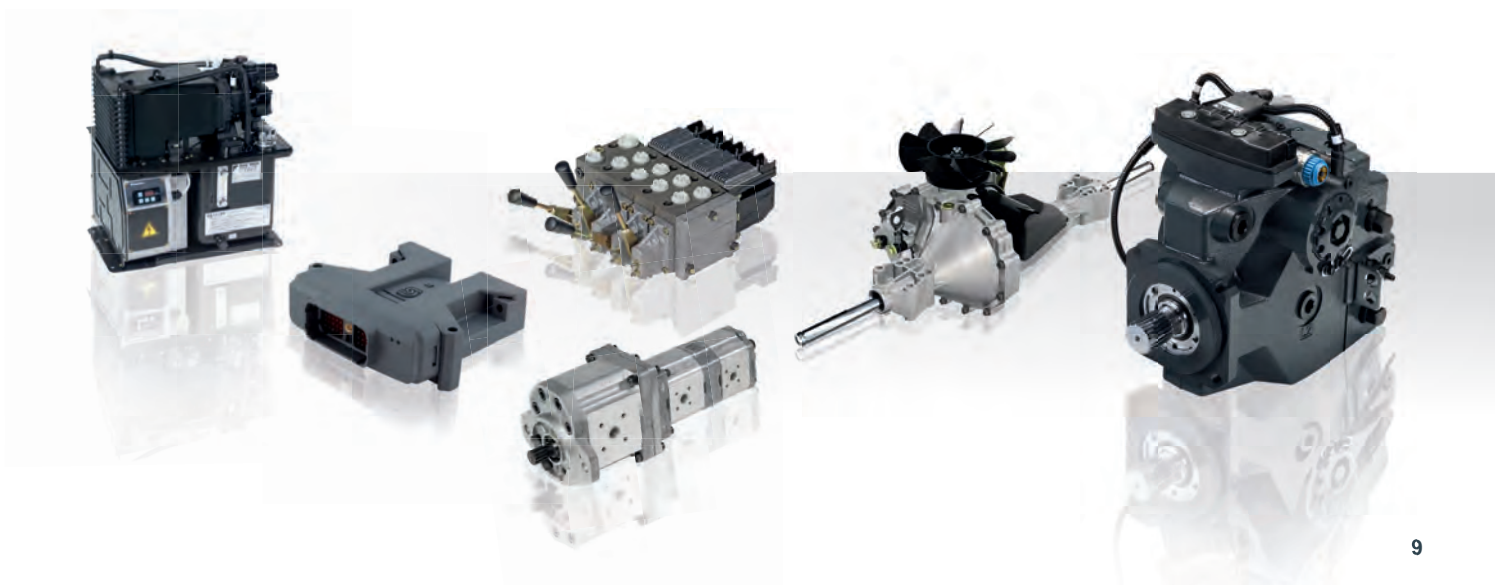

Part of our daily business is that farmers and forestry workers from the region come to our factory to buy spare parts so they can get straight back to work.

Industry competence

- Hydraulic pumps and motors
- Gear pumps and motors
- Hydraulic valves
- Cartridge valves
- Clamp-in valves
- Electrohydraulics
- Ventilation systems
- Hydrostatic propel drives
- Hydrostatic compact axles
- Hydrostatic compact gearboxes
- Units
- and much more...

Service and support

**WE ARE THERE FOR YOU,
WHEREVER AND WHEN-
EVER YOU NEED US.**

Service separates the wheat from the chaff.

These days production companies, farmers, forestry businesses or construction companies simply cannot afford downtimes in any of their economic processes. The market is too hard and the competition is too great.

That is why SAUER BIBUS has always prioritised maximum availability of spare parts and rapid support by service specialists on site.

We guarantee large stocks of components and wearing parts in our modern, efficient logistics centre. It is matter of course for us that replacement part orders are dispatched from our factory on the same day.

Whether you need to replace components in hydraulics drive or in other units and machines, in SAUER BIBUS you have a reliable, efficient partner at your side. When the going gets tough we are there for you wherever you need us with our optimally equipped service vehicles.

All repairs and overhauls are performed using original brand-quality components.

The highly-trained employees at our service centre advise customers in person and on the phone.

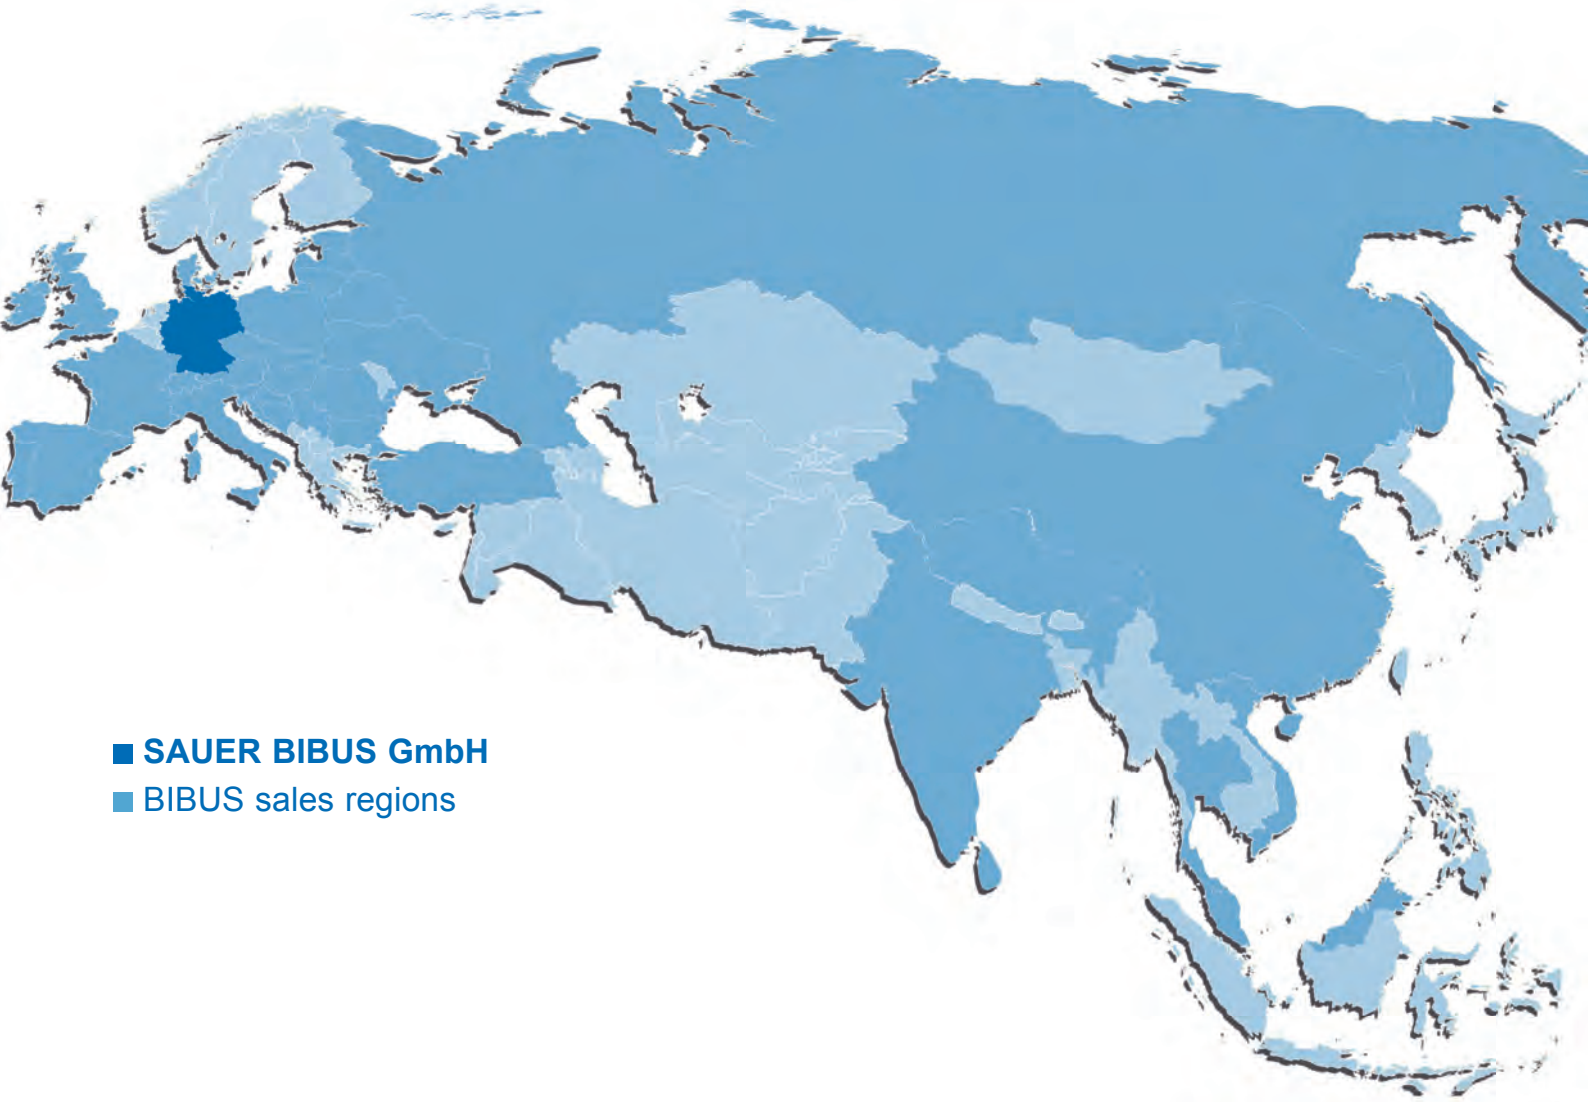

There is always a key objective at the heart of our thoughts and actions: To get you – as our customer – mobile again and to keep your productivity at the highest level.

- Modern, efficient logistics centre
- All common replacement and wearing parts immediately available from stock
- Dispatch of replacement part orders on the same day
- Own service transport fleet
- Highly-trained service specialists
- Service on site and directly in the factory
